- ◆ Optical Bonding technology, the gap between glass and display screen is further reduced which reduces diffuse reflection and improves the display effect.
- ◆ The integrated design is simple and beautiful, and the screen supports 90 ° rotation.
- ◆ All Signal Sources Annotation, built-in Android writing software.
- ◆ Antenna hidden inside.
- ◆ Equipped with 20 points of high-precision capacitive touch.
- ◆ The software supports the eye care mode and takes care of the health of users.
- ◆ 2.0mm AG+AFglass.
- ◆ Plug-in type-c interface camera.
- ◆ Built-in 8-channel microphone array.

## Product Introduction

The Rotation Screen is a multi-functional intelligent office device featuring 90° rotatable and height-adjustable screen, which suits different viewing angles, avoids glare, and satisfies diverse needs like landscape plan display and portrait mobile projection.

## Features

### Supports 90 ° rotation

90° rotation enables seamless portrait/landscape switch for meetings, presentations and document reviews.

### Plugable camera

Wide color gamut coverage delivers vivid, true-to-life hues for immersive visual experiences across scenarios.

## High-capacity Battery

Rotatable meeting screen with high capacity battery ensures all day reliable operation without frequent charging.

## Wireless Screen Mirroring

HD instant connection without lag, cross-device sharing for efficient meetings and office work.  
Supports up to 6 split screens.

## Movable Conference Screen

Supports 360° smooth movement, allowing the rotatable conference screen to be easily and flexibly moved to any location.

## Scan to save meeting minutes

Scan the QR code to get meeting minutes, save and share quickly for efficient team work review.
